LYNK II
Communication Gateway

For Discover AES LiFePO$_4$ Solar Stationary, AES RACKMOUNT and AES PROFESSIONAL Batteries

LYNK II Communication Gateway aggregates and displays in real-time the State of Charge for AES LiFePO$_4$, AES RACKMOUNT and AES PROFESSIONAL batteries. Unlock the full potential of these lithium batteries by enabling them to optimize the charging configurations of hybrid inverter-chargers and solar charge controllers.

Turn a good solar system into a great one with up to 25% improvement in 0% to 100% SoC recharge time. Remotely monitor SoC and data log multiple sites using the data monitoring services offered by inverter systems.

REAL-TIME DATA

State of Charge (SoC), voltage, temperature and battery status is communicated in real time to hybrid inverter-charger.

FASTER CHARGING

Up to 25% faster 0% to 100% SoC charging with dynamic charge management.

REMOTE MONITORING

Remotely monitor the aggregate SoC for a string of batteries, and data log sites using the data monitoring services offered by hybrid inverter systems.

FULL COMPATIBILITY

Battery related settings are automatically programmed for multiple brands of hybrid inverter-chargers and solar charge controllers.

STATUS VIEW

At-a-glance SoC LEDs, communication status LED.

MAXIMIZE THE BATTERY

Internal cell balancing is optimized, enabling the highest usable capacity and true 100% depth of discharge over the entire life of the battery.

PROGRAMMABLE RELAYS

Trigger relays using battery SoC and DC current to control external devices such as generators and HVAC.
